

MEMORANDUM OF UNDERSTANDING

COMMERCIAL FIELD-TRAINING & SUBCONTRACT AGREEMENT

1. PARTIES & OPERATIONAL INTENT

This Agreement is entered into by and between **The Veterans Resurgence Project** (hereinafter 'the Project'), a local public benefit non-profit corporation, and the undersigned Commercial Logging Partner (hereinafter 'the Partner'). The purpose of this agreement is to integrate disciplined, structured veteran field units into active commercial timber and forestry environments. This arrangement is designed to provide veterans with crucial real-world conditioning, team accountability, and hard-nosed operational exposure while actively supporting the commercial production timelines, brush-clearing metrics, and site preparation needs of the Partner.

2. SCOPE OF SERVICES

The Project agrees to deploy organized mobile units capable of delivering commercial-grade field support. The scope of work permitted under this subcontracting framework includes, but is not limited to, the following activities:

- **Wildfire Recovery & Stabilization:** Hands-on land management to stabilize severely damaged regional hillsides.
- **Watershed Care & Maintenance:** Strategic brush removal, debris extraction, and erosion prevention around water systems.
- **Timberland Operational Support:** Manual brush clearing, slash pile management, general site preparation, and invasive species control.

3. OPERATIONAL ROADMAP & REGIONAL TIMELINES

Both parties explicitly acknowledge that the operations of the Project are scaling in accordance with a strict training and mobilization calendar. The execution of field deployments under this Agreement will adhere to the following phase-in constraints:

- **Waterloo Park Central Hub:** Full physical mobilization and centralized coordination of field units out of the Waterloo Park operational base will officially launch during the upcoming *Spring Term*. Early field deployments prior to this date will rely on direct site-to-site transit routing.
- **Benton County Expansion:** Field services under this contract are initially restricted to Linn County. Operational expansion into Benton County sites will commence next summer, contingent upon the successful establishment and deployment of the specialized mobile travel training crews.

4. OPERATIONAL MANAGEMENT & SAFETY SAFEGUARDS

To maintain maximum safety standards on commercial timber ground, strict cohort boundaries will be maintained at all times:

- **Autonomous Command:** Deployed veteran cohorts operate under the direct oversight of an assigned Project Crew Leader and site assistants. The Partner's supervisors dictate high-level production targets, but the Project handles all direct human logistics, personnel issues, and tactical field execution.
- **Mandatory 0800 Briefings:** Every single deployment day initiates with a sharp, mandatory safety roll-out, tool check, and operational briefing at 0800 hours. No crew member hits the wood without passing this briefing.
- **Zero-Tolerance Substance Policy:** The Project enforces an absolute, zero-tolerance drug and alcohol policy. Any crew member violating site safety standards or showing signs of impairment will face immediate expulsion from the site and termination from the cohort.

5. FINANCIAL STRUCTURE & SUBCONTRACTING RATES

This agreement operates strictly under an asset-light fee-for-service model. The Project utilizes external public benefit grants to cover 100% of crew training stipends, specialized safety gear, personal field equipment, and comprehensive commercial liability insurance. To offset logistical overhead and build a sustainable long-term financial runway, commercial assignments are billed as follows:

- **Blended Subcontract Rate:** The Partner agrees to compensate the Project at a flat, discounted rate of **\$24.50 per crew hour worked**.
- **Invoicing Cycle:** Field hours are tracked daily via the On-Site Field Invoice Tracker. Invoices will be generated and issued by the Project bi-weekly, with standard Net 15 payment terms.
- **Capital Reinvestment:** In alignment with non-profit mandates, 100% of the gross revenue generated from this \$24.50 hourly rate is legally restricted to fund future veteran cohorts once initial launch grants expire.

6. STRICT INSULATION OF ADVISORY STATUS

Both parties explicitly acknowledge and agree that **technical advisory roles and commercial subcontracts are entirely separate, independent frameworks** designed to preserve clean governance and comply with federal tax laws:

- **Voluntary Public Service:** Technical Advisory Board roles are entirely voluntary and non-voting. Any technical feedback, forestry wisdom, or safety input provided by the Partner or its staff is delivered at **zero cost (\$0.00/hr)** as a civic contribution to veteran rehabilitation.
- **Anti-Preference Guardrails:** Board participation does not grant the Partner preferential pricing, exclusive access to crew schedules, or discounted field rates, nor is it a prerequisite for executing this commercial subcontract.
- **Private Inurement Compliance:** Charging the flat \$24.50/hr commercial rate ensures that the Project does not distribute non-profit assets or free labor to private for-profit entities, completely shielding both

parties from regulatory conflicts.

- **Talent Pipeline Priority:** In exchange for providing live-ground conditioning and safety oversight, the Partner retains exclusive, first-look priority rights to recruit and hire top-performing veteran operators into full-time, permanent private-industry roles upon cohort graduation.

7. AUTHORIZATION & EXECUTION OF TERMS

By appending signatures below, both the Project and the Partner formally accept the operational terms, financial rate structures, safety guardrails, and compliance regulations detailed within this multi-page Memorandum of Understanding. This agreement shall remain in effect for twelve (12) months from the date of execution and may be renewed or modified only via a written amendment signed by authorized representatives of both entities.
